THE SKILLS CHALLENGE IN EMERGING AND DEVELOPING ECONOMIES

Dirk Van Damme – OECD/EDU

Educational attainment rates (2015)

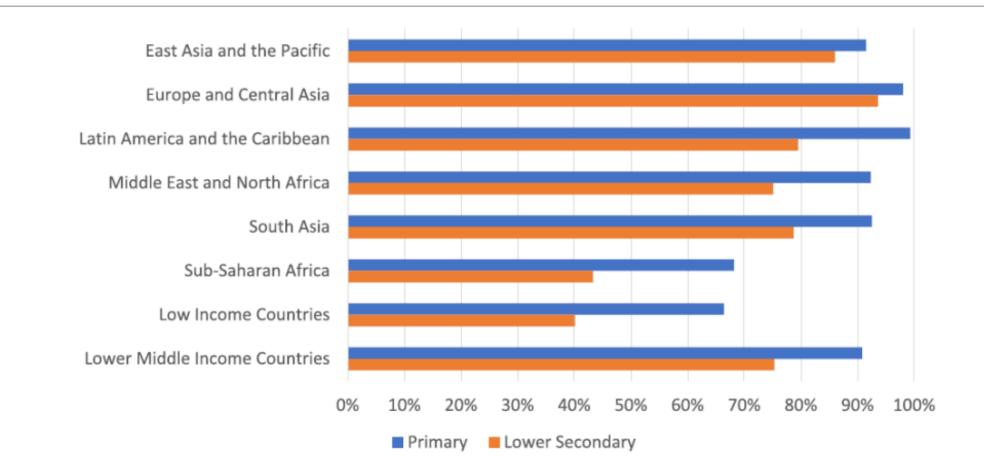

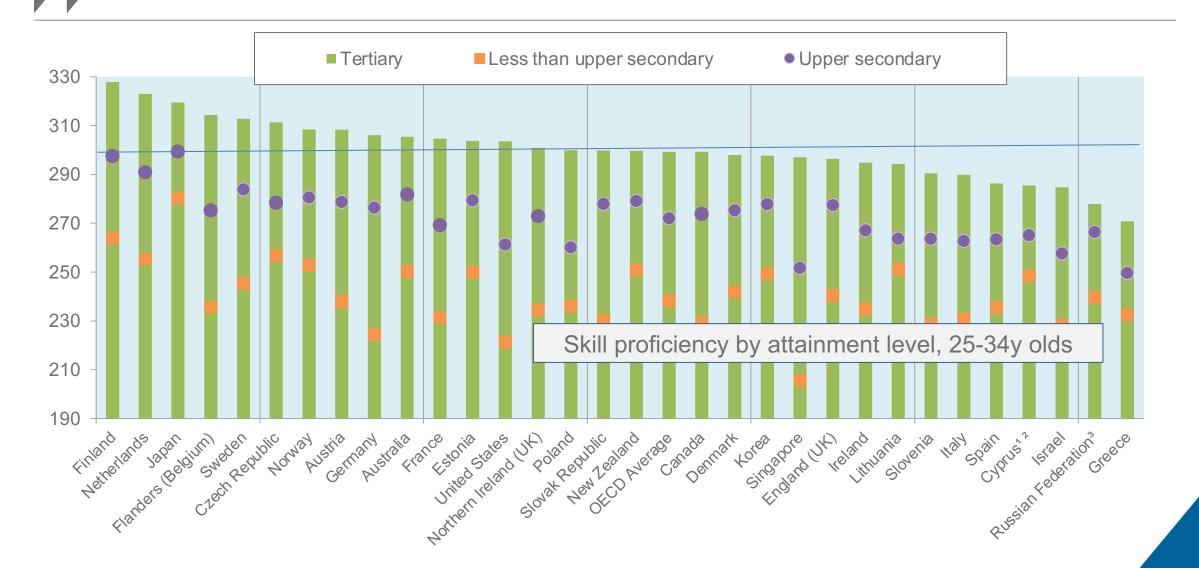

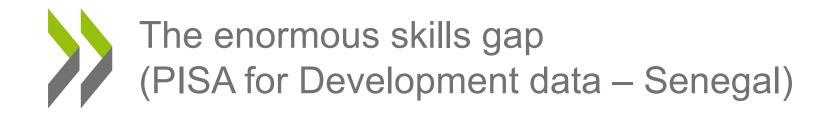

Figure 3: Primary and Lower Secondary Completion Rates across Regions in 2015 *Source:* Author tabulations using data from World Development Indicators (2020). The disconnect between education and skills

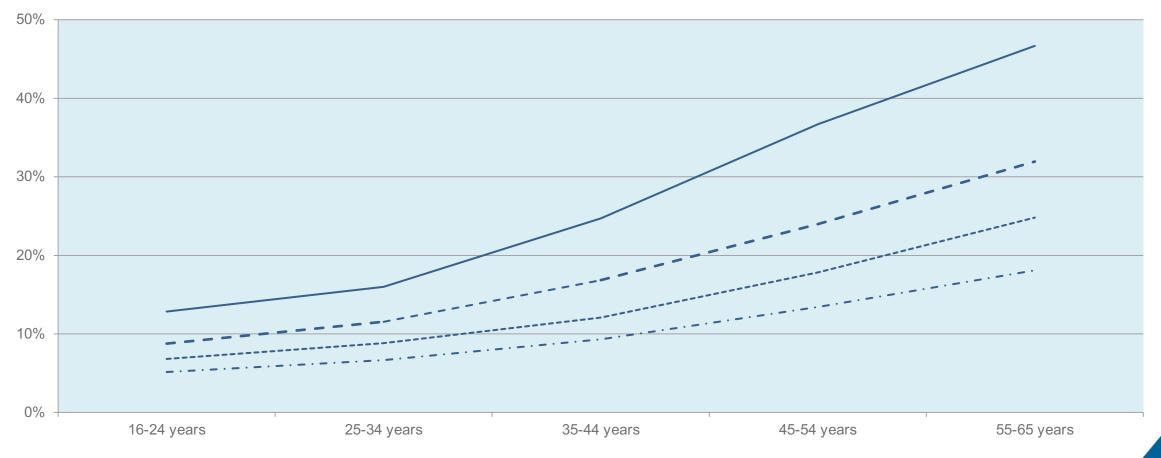

Senegal	Below Level 1c	Level 1c	Level 1b	Level1a	Le	evel 2 and above
Zone 7: In-school	4	23	42		22	9
Zone 6: Fading out	5 2	8	48		19	
Zone 5: Secondary dropouts	36	5	39		25	
Zone 4: Primary leavers	2	58		38	2	
Zone 3: Grade 6 or below	3	54		40	3	
Zone 2: Primary dropouts	11		68		20 1	
Zone 1: Never enrolled	9		68		23	
	100	80	60 4	0 2	0	0 20

Percentage of adults in fair or poor health, by age and numeracy proficiency

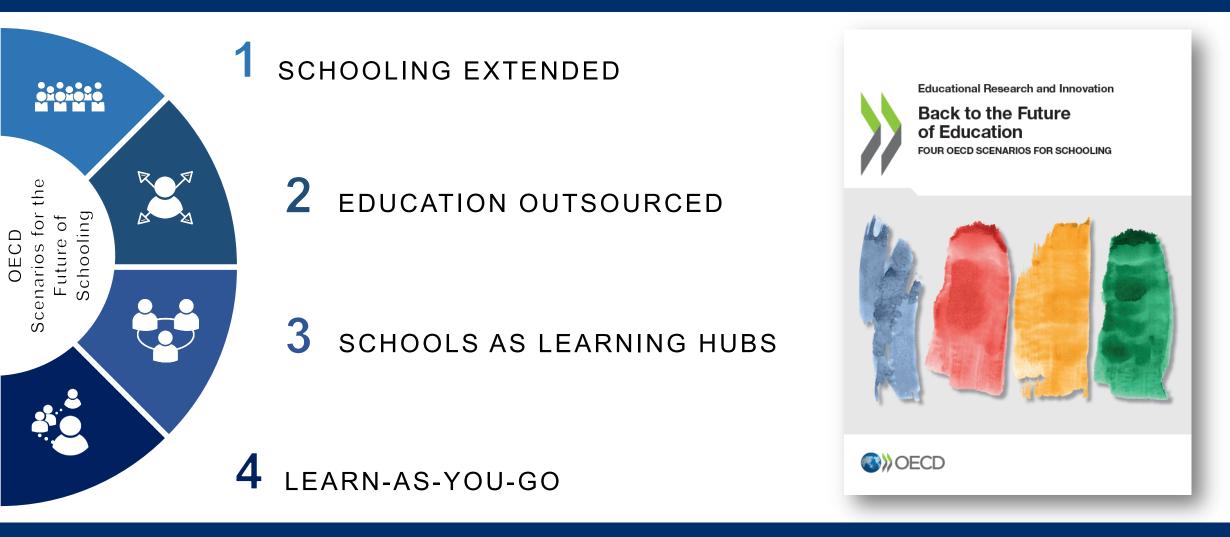

Level 1 or Below 1 – Level 2 ----- Level 3 – · – Level 4/5

- In emerging and developing economies, a schooling strategy will not be able to tackle the skills challenge
 - Institutionalization investments are too high
 - Progress is too slow
 - Equity issues increase, since the bottom of the pyramid is not served well
- A parallel scenario of skills increase through non- and informal learning opportunities, supported by technology is absolutely necessary

Four OECD Scenarios for the Future of Schooling

Back to the Future of Education: Four OECD Scenarios for Schooling

Scenario 4: Learn-as-you-go

Education takes place everywhere, anytime. Distinctions between formal and informal learning are no longer valid as society turns itself entirely to the power of the machine.

Traditional goals and functions of schooling are overwritten by technology. Dismantling of schooling as a social institution.

Open market of "prosumers" with a central role for communities of practice (local, national, global).

(Global) governance of data and digital technologies becomes key.
